

## **PREFACE**

*"The goal of education is the advancement of knowledge and dissemination of truth" — Joh F Kennedy*

*The real objective of education is to enrich the lives of students and create articulate and expressive thinkers who are socially responsible, resilient, and active citizens of the world. Education is about teaching students, not subjects making them lifelong learners. Engaging students in their learning, and maximizing the potential of each and every child is the real purpose of education. Looking beyond the child's intellect and focussing upon the holistic grooming is the focus of the school. Making learning as a life long journey is the very purpose of education for which the institution is committed for.*

### **OBJECTIVES OF CURRICULUM**

- *This curriculum is aimed at building the faculty of reasoning and channeling the thoughts into productive learning.*
- *Give the opportunity to maximize the pupil's potential.*

*"The function of education is to teach one to think intensively and critically. Intelligence plus character, that is the goal of true education"*

*—Martin Luther King Jr.*
