

PREFACE

"Education is not the filling of a pail, but the lighting of a fire"

The aim of imparting education is not only to increase the knowledge but also to create the possibilities for a student to invent and discover.

The purpose of this syllabus, thus, is to establish minimum basic concepts for each subject to meet the needs of all our students.

All the elements in this curriculum model amalgamate to bring out the best in every child and enable them to be on the path of continuous progress.

Contained within this booklet, is the pattern of examination and detailed datesheet for the whole session which will help a child to get prepared for assessment and evaluation with ease and also bring about uniformity in the teaching learning process.

Objectives of the Curriculum

- To identify and articulate the curriculum challenges for educating young people for the twenty first century.
- Taking care of different styles of learning i.e. audio, visual and experimental.
- The theoretical knowledge to be pursued ensuring maximum application of it.
- Correlating academics to real life situations balancing social and emotional stimulation among children and imbibe human values.
- To shape and influence the development of a national collaborative approach to curriculum.
